PROFESSIONAL SUMMARY

Multimedia Student & 3D Generalist bridging **computer engineering logic** with **creative visual production**. Skilled in building high-fidelity 3D asset pipelines, short-form video editing, and structural database logic.

TECHNICAL TOOLSETS

- **Creative:** Blender (3D Modeling, Shading, Lighting), CapCut, Filmora (Motion Pacing, Video Editing)
- **Technical:** C++, MySQL, Linux (System Administration & Backend Logic)
- **UI/UX:** Human-Computer Interaction (HCI) Principles, Visual Hierarchy, Interaction Feedback

EDUCATION

- **B.ITM (Hons.) in Multimedia** | Universiti Teknikal Malaysia Melaka (UTeM)
 - 2024 – Present (Year 2 Sem 2)
- **Diploma in Electronic Engineering (Computer)** | Politeknik Merlimau Melaka (PMM)
 - Graduated 2024

CORE PROJECTS

- **Digital Portfolio Web Application** * Developed a responsive dark-theme site using clean CSS/HTML layout systems.
 - Programmed custom intersection scroll-sensors for dynamic element flow-in animations.
- **Sports Equipment Booking System (SEBS)**
 - Engineered a database management app with a **C++** front-end and **MySQL** backend.
 - Built structural validation logic constraints to eliminate booking collisions and generate instant receipts.
- **3D Animated Logo Service**
 - Designed dynamic 3D logo intros and custom material shaders within **Blender**.

KEY STRENGTHS

- **Technical Adaptability:** Fluidly navigates advanced 3D nodes and rigid database infrastructure.
- **Precision Focus:** Dedicated to optimized 3D mesh layouts, UV-unwrapping, and UI contrast.
- **Problem Solver:** Proven ability to debug layout limits and pipeline issues with peers.
